

Vision of TI Ukraine

By Jose Ugaz

I believe TI Ukraine is facing a big challenge regarding the designation of judges for the Anticorruption Court and should intensify its work in this field.

Since the democratic spaces are permanently under threat, including gross violations of human rights, a revision of the strategy to increase impact and visibility regarding the anticorruption agenda, linking the relation between grand corruption and human rights, is needed. I think that the pillar of engagement included in the draft strategy needs to be prioritized. Campaigning, mobilizing people, identifying allies and working with the private sector should be in the center of the action of the organization's progress in 2019-2020.

Regarding the fight against impunity, the Yanukovich case is still a pending challenge and must be addressed.
